

Def. Cont. Sub. G1

- b) as oxidant, at least three compounds selected from the group consisting of peroxides, nitrates, chlorates [or] and perchlorates; and
- c) combustion moderators which are capable of influencing the combustion and its rate by heterogeneous or homogeneous catalysis[; and optionally also
- d) additions which are capable of reducing the proportion of the toxic gases].

2. (Amended) Gas-producing [agent] composition according to claim 1, [characterised in that it] wherein said gas-producing composition contains as [combustibles (nitrogen-containing compounds)] nitrogen-containing compounds, one or more tetrazole derivatives of the formula:

in which R, and R₂ or R₃ can be the same or different, with either R₂ or R₃ being present, and representing [standing for] hydrogen, hydroxy, amino, carboxyl, an alkyl radical with 1 to 7 carbon atoms, an alkenyl radical with 2 to 7 carbon atoms, an alkylamino radical with 1 to 10 carbon atoms, an aryl radical, a substituted aryl radical [optionally] substituted with one or several substituents which can be the

same or different and are selected from [the] an amino group, [the] a nitro group, alkyl radicals with 1 to 4 carbon atoms or an arylamino radical in which the aryl radical is substituted, [optionally be substituted, or the] and sodium, potassium and guanidinium salts of [the] said tetrazole derivatives.

3. (Amended) Gas-producing [agent] composition according to claim 2, [characterised in that] wherein R, [preferably stands for] is selected from the group consisting of hydrogen, amino, hydroxy, carboxyl, a methyl, ethyl, propyl, [or] isopropyl, butyl, isobutyl, [or] tert-butyl, n-pentyl, n-hexyl, [or] n-heptyl [radical], [a] methylamino, ethylamino, dimethylamino, n-heptylamino, n-octylamino, [or] n-decylamino [radical], [a] tetrazole [radical], [a] phenylamino [radical], [a] phenyl, nitrophenyl, [or] and aminophenyl [radical]; and R₂ [or] R₃ [preferably stands for] is selected from the group consisting of hydrogen, a methyl, [or] ethyl [radical], [a] phenyl, nitrophenyl, [or] and aminophenyl radical.

Subj

4. (Amended) Gas-producing [agent] composition according to claim 2 [any one of claims 1 to 3, characterised in that] wherein the nitrogen-containing compounds are selected from the group of the tetrazole derivatives and are [preferably] selected from the group consisting of compounds,

5-aminotetrazole[,] ; lithium, sodium, potassium, zinc, magnesium, strontium or calcium 5-aminotetrazolate[,] ; 5-aminotetrazole nitrate, sulphate, or perchlorate [and similar compounds,] ; 1-(4-aminophenyl)-tetrazole, 1-(4-nitrophenyl)-tetrazole, 1-methyl-5-dimethyl-aminotetrazole, 1-methyl-5-methylamino-tetrazole, 1-methyltetrazole, 1-phenyl-5-aminotetrazole, 1-phenyl-5-hydroxytetrazole, 1-phenyltetrazole, 2-ethyl-5-aminotetrazole, 2-methyl-5-carboxyltetrazole, 2-methyl-5-methylaminotetrazole, 2-methyltetrazole, 2-phenyltetrazole, 5-(*p*-tolyl)tetrazole, 5-diallylaminotetrazole, 5-dimethylaminotetrazole, 5-ethylaminotetrazole, 5-hydroxytetrazole, 5-methyltetrazole, 5-methylaminotetrazole, 5-n-decylaminotetrazole, 5-n-heptylaminotetrazole, 5-n-octylaminotetrazole, 5-phenyltetrazole, 5-phenylaminotetrazole, [or] bis-(aminoguanidine)-azotetrazole and diguanidinium-5,5'-azo-tetrazolate, [as well as] 5,5'-bitetrazole [and its salts, such as the] and 5,5'-bi-1H-tetrazoleammonium compounds.

7. (Amended) Gas-producing [agent] composition according to any one of claims 1 to 6, [characterised in that it] wherein said gas-producing composition contains as oxidant a combination of zinc peroxide, potassium perchlorate perchlorate and at least one nitrate[, preferably sodium nitrate or strontium nitrate].

9. (Amended) Gas-producing [agent] composition
according to any one of claims 1 to 8, [characterised in that]
wherein the ratio of the nitrogen-containing compounds to the
oxidants [in the mixture] is balanced such that on combustion
of the gas-producing [mixture] composition, oxygen is formed
in excess.

10. (Amended) Gas-producing [agent] composition
according to any one of claims 1 to 9, [characterised in that]
it] wherein said gas-producing composition contains, as
combustion moderators, [substances or mixtures thereof]
compounds which are capable of influencing [the] combustion
and its rate by heterogeneous or homogeneous catalysis, the
proportion of these [substances in the mixture] compounds
amounting to up to 8%.

11. (Amended) Gas-producing [agent] composition
according to any one of claims 1 to 10, [characterised in that]
it] wherein said gas-producing composition contains [as]
combustion moderators selected from the group consisting of,
metals, metal oxides [and/or] metal carbonates, [and/] metal
sulphides [or] and mixtures of these combustion moderators[,
the metals used preferably being boron, silicon, copper, iron,
titanium, zinc or molybdenum].

14. (Amended) Gas-producing [agent] composition

according to any one of claims 1 to 13, [characterised in that it] wherein said gas-producing composition [contains as addition substance:] further comprises an addition substance selected from the group consisting of combustion moderators, noble metals [such as palladium, ruthenium, rhenium, platinum or rhodium or oxides of the noble metals], [and] mixtures of these compounds, [or] basically reacting substances [such as, for example,] selected from the group consisting of oxides, hydroxides, [or] carbonates of alkali and alkaline earth metals, [of] zinc, [as well as] mixtures of these compounds, [or] urea, guanidine [and derivatives thereof,] compounds having NH₂ groups [such as, for example,] selected from the group consisting of amidosulphonic acids, amido complexes, amides, and mixtures of these compounds.

composition for gas generators, comprising nitrogen-containing compounds, [characterised in that it contains:] wherein said gas-producing composition comprises,

a) as nitrogen-containing compound [(fuel)], a combination of aminotetrazole and [the salts, preferably the] calcium, magnesium or zinc salts[,] of aminotetrazole, [preferably a combination of 5-aminotetrazole and the corresponding salts of 5- aminotetrazole];

b) as oxidant, at least three compounds selected from

the group consisting of peroxides, nitrates, chlorates [or] and perchlorates[, preferably sodium nitrate and potassium Perchlorate]; and

c) combustion moderators which are capable of influencing [the] combustion and its rate by heterogeneous or homogeneous catalysis[, preferably] selected from the group consisting of zinc oxide and [the] carbonates of zinc and calcium.

Please add the following claims to the application.

--26. The gas-producing composition according to claim 1, further comprising additions which are capable of reducing the proportion of toxic gases.

27. The gas-producing composition according to claim 7, wherein said at least one nitrate is sodium nitrate or strontium nitrate.

28. The gas-producing composition according to claim 11, wherein the metals are selected from the group consisting of boron, silicon, copper, iron, titanium, zinc and molybdenum.

29. The gas-producing composition according to claim 14, wherein the noble metal is selected from the group consisting of palladium, ruthenium, rhenium, platinum, rhodium and oxides of the noble metals.
